Dear Dymola interested,

**Dymola 7.4 available**

Dymola 7.4 is now released. There are several enhancements and extensions, for example,

- Support for FMI (Functional Mock-up Interface), from the ITEA2 MODELISAR project.
- Improved documentation handling in many ways.
- Greatly improved simulation speed by utilizing sparse Jacobian handling. For example, many models of the Air Conditioning library run 2-6 times faster in Dymola 7.4.
- New Hydraulics library (the old one is also included so conversion can be made when appropriate).

**Upgrades**

Instructions for upgrades are distributed by e-mail in the case you are entitled to upgrades. If you are missing such an e-mail, please contact your reseller.

**Contact us**

If you have any questions concerning the new functionality of Dymola 7.4, please do not hesitate to contact your reseller or [Dymola.Sales@3ds.com](mailto:Dymola.Sales@3ds.com).

We hope you will enjoy Dymola 7.4 with its enhanced functionality.

Best regards,
